## 3D & Dual Shades

### 3D Shades

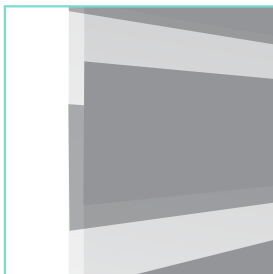

3D Shades operate like conventional roller blinds however they look like venetians made from sheer material and can be tilted or stacked upwards pending lighting and privacy requirements. This innovative translucent fabric provides any home with a warm glow, soft view, protection from UV rays and privacy control without completely darkening the environment.

\*3D shades cannot be motorised using somfy

### DUAL Shades

Dual Shades operate like roller blinds too but have two fabric screens which overlap and can be adjusted to control lighting and privacy. As the solid and transparent panels cross over you have the option of exposing a view through the transparent sections, or close the strips to offer complete privacy.

**12 Month** Limited Warranty
