The System 2000 Pivot Arm Awning is an extremly robust awning engineered for the harsh Australian environmental conditions.

- Spring operated arms makes for ease of operation
- Offers both External and Internal (great for high or hard to reach windows) control options.
- Great for privacy and sun protection, this awning also allows for ample airflow through the window to catch those cooling breezes
- Unique design allows for Adjustable locations of the arms and mounting brackets making it ideal

• Sun / UV Protection • Allows Airflow • Privacy • Internal Control option • Motorised Option

Construction:
